Full-Stack Developer with experience in over 50 front-end projects using React, Redux, and TypeScript, and over 20 back-end projects designing APIs and databases with Ruby on Rails and Node.js.

Work Experience

Software Architect
Jan 2023 - Nov 2024
[IMMILAND CANADA](#) | *Montreal*

Designed an application for managing visa processes, appointments, translations, and communication through an automated platform.

- Optimized legacy code in a messaging app, enhancing translation management and profile editing (Typescript, React, NodeJs, Tailwind).
- Developed a system enabling the creation and editing of custom forms (React, NodeJs, PostgresQL).
- Dashboard optimized for managing 10+ components, including notifications, promotions, and processes, tailored for client and admin users (Api Rest, Tailwind, css, React, Web design).
- Interface design for managing visa processes, tailored for client and consultant users (React, Typescript, Figma).
- Developed an automated bot for streamlined form filling (Python, Google Api, React).

Mentor
May 2022 - Jun 2023
[Microverse](#) | *California, United States*

Mentored 5 junior developers, offering technical support in React, Ruby, and JavaScript. Suggested code improvements and best practices to enhance quality and performance across 20+ projects.

- Developed 5 apps using various technologies, including React, Webpack, Babel, Ruby on Rails, PostgreSQL, HTML, and CSS."
- Mentored and reviewed code for over 20 full-stack students, focusing on Ruby on Rails, React, and database management
- Tested over 20 projects using Jest, Capybara, and other testing frameworks.

Technical Supporter
Sep 2018 - Jan 2022
[CANAWAY](#) | *Toronto*

Improve the virtual class environment and improve user experiences in the class content.

- Creation of 150 interactive activities for improving learning English skill.
- Gamification of content using Javascript, Html, Css for at least 120 presentations.

Core Skills
